

Invitation

Innovation and e-Assessment Seminar

Assessment Tomorrow and UK Trade and Investment in conjunction with Dubai Men's College - Monday 17th January 2011

The seminar is designed to showcase how innovatory technologies can enhance and extend skills development, learning and the assessment process.

You are cordially invited to join this seminar which will take place on Monday, 17th January 2011 at HCT, Dubai Men's College, Academic City, Dubai, UAE.

Technology is making a major impact on the ways in which learning and assessment is delivered in the 21st century. For example, the use up of e-Assessment is increasing world-wide as schools, colleges, training providers and higher education begin to realise the benefits of bringing technology to bear on the delivery of both formative and summative assessment. Mobile learning and assessment is providing the opportunity to exploit the latest technologies and bring them to a wider audience. This seminar will examine these innovative developments and provide delegates with the opportunity to discuss and examine potential development in their use within their own organisations.
